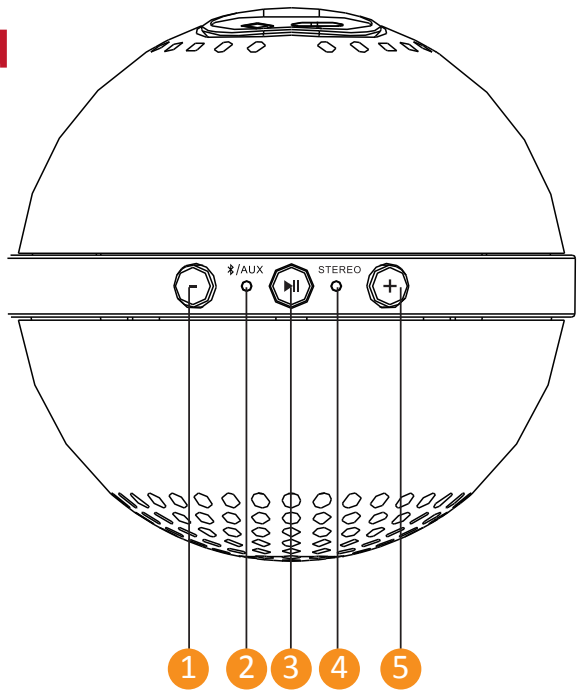
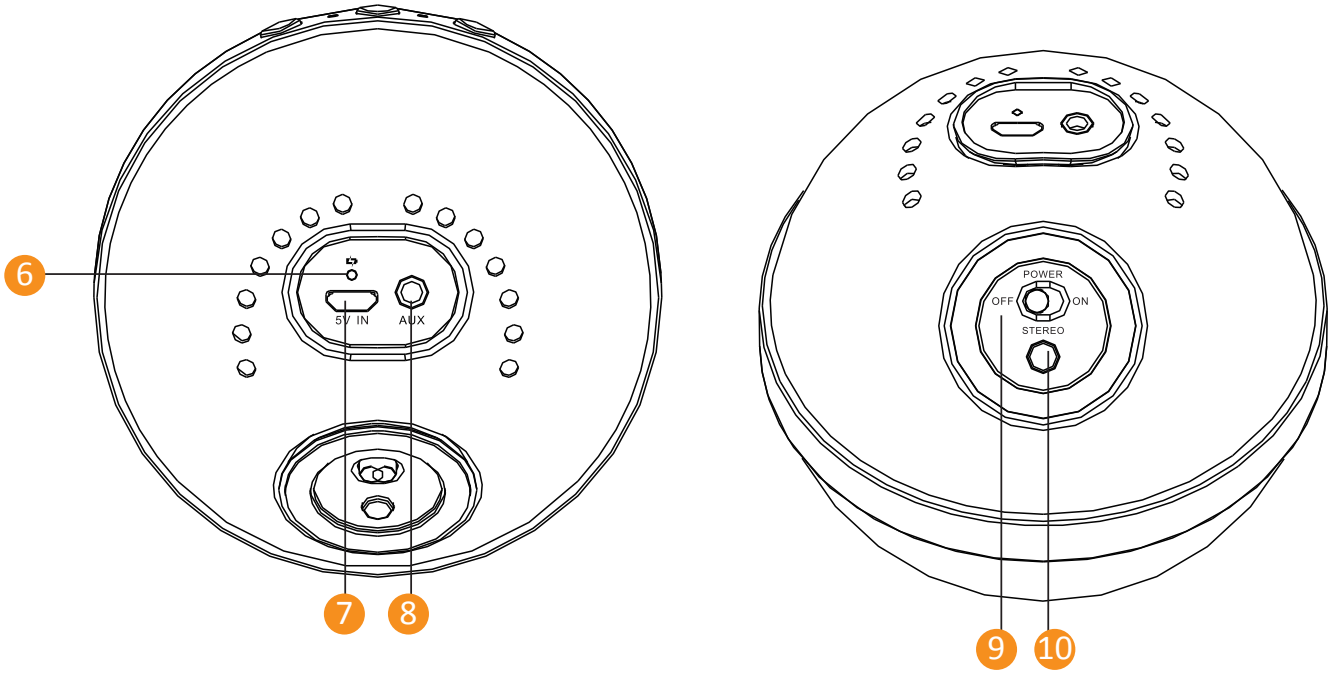
Getting Started



1: Volume up: Short Press to increase volume
2: Volume down: Short Press to decrease volume
3: Play: Short Press – Play/Pause; Long press: Bluetooth™ pairing
4: Audio mode LED indicator:
Default: blinks in blue while looking for connection
Bluetooth™ pairing: red/blue flash alternately
Bluetooth™ connected: solid blue
AUX-in mode: solid red
5. Stereo connection LED
Second Orbit is connecting: Green/Blue flash alternately
Second Orbit connected: Solid green light



6. Charge Indicator

Charging: solid red

Fully charged: solid green

7. Micro-USB Charging Port

8. Aux-in Jack

9. Power on/off

10. Stereo Button: Long press to pair a second Orbit.

Operation Instructions:

To switch the Orbit ON, toggle the Power Button on bottom of the speaker.

Pairing Orbit to your Device

Long press the “Play/Pause” button to connect Orbit to your Bluetooth™ enabled smartphone/tablet/MID/MP3, etc. The speaker will then enter pairing mode: you will hear an indicating sound and the Bluetooth™/AUX LED will start blinking in red/blue alternatively.

Enable the Bluetooth™ on your device and browse for devices. When Orbit appears on your screen, select it. Wait for a few seconds; the speaker will then emit an indication sound and the Bluetooth™/ AUX LED will turn to solid blue. Your device is now paired to Orbit and you can enjoy your favourite music.

Pairing two pieces of Orbit

Turn on both speakers and long press the “STEREO” button of each speaker. The "STEREO" and "Bluetooth/AUX" LED will start flashing in green/blue while the speakers are pairing. When successful connection is established, the “STEREO” LED turns to solid green. The first time you connect to another Orbit, the pairing may require a minute or two. Pairing with the same device in future will happen within seconds.
After the two Orbits are connected, long press the “Play/Pause” button on one of the speakers and then follow the instructions above (**Pairing Orbit to your Device**).

If dropout occurs frequently, power off the speakers and redo the pairing.

Please note:

The Orbit, which is paired with your Bluetooth™ enabled device, is the main speaker and works in the so-called “L” channel, the second Orbit is the external speaker and works on the “R” channel.

While the two Orbits are operating, you can switch off the satellite speaker and the main speaker will continue operating.

When you power off the main speaker, satellite speaker will stop playing as well, if so, please power off satellite speaker to save battery.

To adjust the volume, simply press one of the speakers vol-/+ button.

The wireless operating distance is 10 meters.

AUX-in Mode Play

Use a 3.5mm cable to connect your Orbit to any device which has a 3.5 mm Audio jack. Simply plug in one of the ends in your Orbit and the other one into the audio jack of your device. The AUX LED will then turn to solid red and Orbit is ready to use.
